

The List of Basic drug screen Detectable Compound (review-2014) 臺北榮民總醫院 臨床毒物與職業醫學科

Nervous類藥物

|                                       |                                     |  |
|---------------------------------------|-------------------------------------|--|
| Nervous-drug                          | 66 flurazepam and metabolite        | 132 promazine  |
| 1 allobarbitol                        | 67 fluspirilene                     | 133 promethazine                                     |
| 2 alprazolam                          | 68 fluvoxamine                      | 134 propofol   |
| 3 amantadine                          | 69 gabapentin                       | 135 prothipendyl                                     |
| 4 amisulpride                         | 70 glutethimide                     | 136 quetiapine                                       |
| 5 amitriptyline and/or metabolites    | 71 halazepam                        | 137 scopolamine                                      |
| 6 amitriptylinoxide                   | 72 haloperidol and/or metabolite    | 138 secobarbital                                     |
| 7 amobarbital                         | 73 hydroxyzine and/or metabolite    | 139 selegiline                                       |
| 8 amoxapine and/or metabolites        | 74 hyoscyamine                      | 140 sertraline and/or metabolite                     |
| 9 aprobarbital                        | 75 imipramine and/or metabolite     | 141 sulpiride  |
| 10 atropine                           | 76 isothipendyl                     | 142 temazepam and/or metabolite                      |
| 11 azacyclonol                        | 77 ketamine and/or metabolite       | 143 tetrazepam                                       |
| 12 baclofen                           | 78 ketazolam                        | 144 thiopental                                       |
| 13 barbital                           | 79 lamotrigine                      | 145 thioridazine                                     |
| 14 benperidol                         | 80 levetiracetam                    | 146 thiothixene and/or metabolite                    |
| 15 benztropine                        | 81 levomepromazine                  | 147 tiapride   |
| 16 biperiden                          | 82 lidocaine and/or metabolite      | 148 tolperisone                                      |
| 17 bromazepam                         | 83 lofepramine                      | 149 topiramate                                       |
| 18 bromperidol                        | 84 loprazolam                       | 150 tranlycypromine                                  |
| 19 benzodiazepine's metabolite        | 85 lorazepam                        | 151 trazodone  |
| 20 bromocriptine                      | 86 lormetazepam                     | 152 trifluoperidol                                   |
| 21 brotizolam                         | 87 loxapine and/or metabolite       | 153 trihexyphenidyl                                  |
| 22 bupropion(amfebutamone)            | 88 maprotiline                      | 154 trimipramine and/or metabolite                   |
| 23 buspirone                          | 89 mebhydrolin                      | 155 valproic acid                                    |
| 24 butabarbital                       | 90 meclozine                        | 156 valpromide                                       |
| 25 camazepam                          | 91 medazepam                        | 157 venlafaxine                                      |
| 26 camylofin                          | 92 melitracen                       | 158 zaleplon   |
| 27 carbromal                          | 93 melperone                        | 159 zimelidine                                       |
| 28 carbamazepine and metabolite       | 94 mephenoaloxone                   | 160 zolpidem   |
| 29 carisoprodol                       | 95 mephobarbital                    | 161 zolpiclone                                       |
| 30 chlordiazepoxide and/or metabolite | 96 mephentermine                    | 162 zotepine   |
| 31 chlormezanone                      | 97 meprobamate                      | Nervous-abused                                       |
| 32 chlorphenoxamine                   | 98 mequitazine                      | 163 amphetamine                                      |
| 33 chlorpromazine and metabolite      | 99 mesoridazine                     | 164 AMT( $\alpha$ -methyltryptamine)                 |
| 34 chlorprothixene                    | 100 methocarbamol                   | 165 bufotenine(5-HO-DMT)                             |
| 35 chlorzoxanone                      | 101 methohexital                    | 166 chlorphentermine                                 |
| 36 chlomethiazole                     | 102 methylphenidate                 | 167 clobenzorex                                      |
| 37 citalopram/escitalopram            | 103 metixene                        | 168 2C-C(2,5-dimethoxy-4-chlorophenethylamine)       |
| 38 clobazam                           | 104 midazolam                       | 169 2C-I(2,5-dimethoxy-4-iodophenethylamine)         |
| 39 clomipramine                       | 105 mirtazapine                     | 170 2C-T-2(2,5-dimethoxy-4-ethylthiophenethylamine)  |
| 40 clonazepam                         | 106 moclobemide                     | 171 2C-T-7(2,5-dimethoxy-4-propylthiophenethylamine) |
| 41 clopenthixol                       | 107 naloxone                        | 172 diethylpropion                                   |
| 42 clorazepate                        | 108 nimetazepam                     | 173 DBT(N,N-dibutyltryptamine)                       |
| 43 clothiapine                        | 109 nitrazepam                      | 174 DET(N,N-diethyltryptamine)                       |
| 44 clotiazepam                        | 110 nordiazepam                     | 175 DIPT(diisopropyl-tryptamine)                     |
| 45 clozapine                          | 111 nortriptyline and/or metabolite | 176 DMT(N,N-methyltryptamine)                        |
| 46 cocaine                            | 112 olanzapine                      | 177 DOB(4-bromo-2,5-dimethoxyamphetamine)            |
| 47 cyclizine                          | 113 opipramol                       | 178 DPT(N,N-dipropyltryptamine)                      |
| 48 cyclobenzaprine and metabolite     | 114 orphenadrine and/or metabolite  | 179 fencamfamine                                     |
| 49 demoxepam                          | 115 oxazepam                        | 180 fenethylline                                     |
| 50 desipramine and metabolite         | 116 oxazolam                        | 181 fenfluramine                                     |
| 51 diazepam                           | 117 oxedrine                        | 182 fenproporex                                      |
| 52 dibenzepine                        | 118 paroxetine                      | 183 isometheptene                                    |
| 53 diphenidol                         | 119 pentobarbital                   | 184 mazindol   |
| 54 dixyrazine                         | 120 perazine                        | 185 MDA(3,4-methylenedioxyamphetamine)               |
| 55 dosulepin (dothiepin)              | 121 pericyazine                     | 186 MDEA(3,4-methylenedioxy-N-ethylamphetamine)      |
| 56 doxepin and metabolite             | 122 perphenazine                    | 187 MDMA(3,4-methylenedioxy-methylamphetamine)       |
| 57 droperidol                         | 123 phenobarbital                   | 188 5-Meo-DIPT(N,N-diisopropyl-5-methoxy-tryptamine) |
| 58 ecogonine methyl ester             | 124 phenylpropanolamine             | 189 5-Meo-DMT(5-methoxy-N,N-dimethyltryptamine)      |
| 59 estazolam                          | 125 phenytoin                       | 190 methamphetamine                                  |
| 60 ethchlorvynol and metabolite       | 126 pimozide                        | 191 methaqualone and metabolite                      |
| 61 ethopropazine                      | 127 pipamperone                     | 192 MMDA(3-methoxy-4,5-methylenedioxyamphetamine)    |
| 62 flunitrazepam and metabolite       | 128 pridinol                        | 193 mephedrone                                       |
| 63 fluoxetine and metabolite          | 129 primidone                       | 194 phenacyclidine                                   |
| 64 flupenthixol                       | 130 prochlorperazine                | 195 phenethylamine                                   |
| 65 fluphenazine                       | 131 procyclidine                    | 196 phenmetrazine                                    |

|     |                                    |     |                                      |     |   |
