SUPER GROW

Super Grow is a new high-tech fertilizer designed by the soil scientists at the New Earth Products Corporation. Super Grow will help you grow the biggest and sweetest vegetables you have ever tasted in your life. Most fertilizers only contain the basic nutrients of nitrogen, phosphate, and potash (NPK). Super Grow contains essential trace minerals and the special ingredient of humic acid, which comes from 75-million-year-old plant deposits in Utah. The benefit of humic acid is that it increases nutrient availability in the root zone of plants. This is the secret to Super Grow. If you follow the special application instructions on the label, we guarantee the biggest vegetables you have ever grown or your money back.
New Earth Product, PO Box 150, Blue Mounds, Wisconsin 53517

To: New Earth Products

I bought a 12-pound bag of your new Super Grow fertilizer at the exorbitant cost of \$43.95 plus \$6.00 for shipping with the expectation of the biggest tomatoes in the world, just as you advertised in the New Age Growers magazine out of Pennsylvania. At a cost of \$49.95, what I got was 20 dead tomato plants.

I applied Super Grow just as I do all the fertilizers I've ever tried, but within one week, all 20 plants began to die. The plants were a hardy Maine variety from an organic farmers I know. I have a second stand of tomatoes in another part of my garden on which I used a different fertilizer. **All of the plants are producing large quantities of fruit. I do not have any diseased plants in my garden, so it appears that there is something wrong with your new fertilizer. Consequently, I want my \$49.95 back.**

Sincerely,
Jill Bettman

Q: Look at the graphic. When was the new version of the software released?

(A) In February
(B) In March
(C) In November
(D) In December

As you can from this data, in the month of the release of the new version of our photo editing software, sales rose to 12,000 units. However, they dropped sharply in June, when our rival, DarkSoft, released a similar product. Our poor sales in November were caused by some negative publicity we received when a programming error caused trouble for some users. Updates were published, and sales returned to normal by the end of the year. Customers appear willing to try rival products, so we need to conduct research into what additional functions users are looking for.

Hi, It's Cindy from Florence Hair and Beauty. Thanks for changing the size of our sign so quickly. There's one more change I'd like to request. We have piece of contact information on the left side of the sign and the other part on the right. I think we should keep them together on the same side. What's more, if we move the information from under the logo and the slogan, we can make those bigger, which is important because they should stand out more. I'll drop by your office at around five afternoon to take a look at the designs.

Q: Look at the graphic. Which information does the speaker want repositioned?

(A) The telephone number
(B) The operating hours
(C) The e-mail address
(D) The slogan
