

## Plasma Catecholamine test Preparation

### 為何需要抽血檢驗兒茶酚胺

您想知道您的高血壓是因為什麼原因引起的嗎？

您想知道您的高血壓有根治的可能嗎？

檢驗兒茶酚胺可以得知您的高血壓是否由嗜鉻細胞瘤所引起。此種疾病及早發現，可以及早治療根治高血壓，否則可能會有致命的危險。為了您的健康著想，檢驗兒茶酚胺時請務必遵守以下事項，確保檢驗結果能夠正確無誤，提供醫師診斷、治療，還給您一個彩色的人生。

#### **Why should I measure plasma catecholamines?**

In certain cases, hypertension may be secondary to an adrenal gland growth called pheochromocytoma. If detected early, the diagnosis and treatment can be promptly initiated to prevent potentially fatal complications. To help provide you with accurate test results, please follow the instructions below:

➤ 抽血前請靜坐至少 30 分鐘，並放鬆心情等待抽血。

Before drawing blood, please sit back and relax for 30 minutes.
